

Leveraging enterprise data for a competitive advantage

Carelon Global Solutions brings the right team and expertise to handle the most complex data management scenarios using a proven enterprise data management framework.

Carelon Global Solutions' enterprise data management service can tackle large dataset migration projects seamlessly with its robust data governance and end-to-end data management, all while ensuring accuracy. We provide L1 to L4 support 24 hours a day, seven days a week, and help customers achieve savings and optimize data in their cloud migration strategy.

2,000+ strong team

Functional knowledge on on-premises software, cloud architecture, and Snowflake data warehouse

Compliant cloud frameworks designed for healthcare; infrastructure services; Hadoop; cloud; extract, transform, load (ETL) processes; and database administration

Expertise in data architecture, data engineering, data analytics and visualization, core application development, cloud implementation, and big data solutions

Impact

12,239

critical batch jobs monitored around the clock

99.8%

system change accuracy

\$2.5

million annual savings

30%

reduction in runtime loads, resulting in monthly savings of **\$6.5K**

30%

improvement in data optimization by bypassing the staging area during migration from prem to cloud

Success story

Data definition language (DDL) auto-sync:

A U.S. health insurer required a continuous and consistent DDL synchronization across legacy systems, newer cloud technologies, and staging layers. Carelon Global Solutions developed a Hadoop-based tool to synchronize DDL across legacy databases and cloud technologies.

Results delivered

- **700** hours saved per month
- Increased savings

Success story

Table base automation:

A U.S. health insurer required a system that was flexible enough to allow business users to update table bases without a scheduled production release. Carelon Global Solutions developed a Pega-based web application that would provide business users with the flexibility they desired.

Results delivered

- Improved time to market
- Over **\$700K** in annual savings
